

Portable computers to the youth who need & deserve them...

VISION: Every youth in Canada who needs a computer has one.

PROGRAM

Recipients are under resourced youth who reside in some of Canada's most challenged neighborhoods, whose lives could be dramatically changed by your generosity.

Our role: Work with partner organizations such as Pathways, YM/YWCA, and YAACE who provide mentoring and tutoring for these youth. The notebooks go directly to the youth through these programs.

Your role: Donate to us your end-of-life cycle hardware. Tax receipts at fair market value issued.

HOW IT WORKS:

Our refurbisher Compugen will:

1. Handle the hardware in a secure ISO 9001:2008 facility
2. Securely wipe the data from the old systems
3. Refurbish the systems to establish a renewed value for the assets
4. Give the unit back to Sky's the Limit to donate to a youth

SECURITY

Compugen's extensive experience managing complex projects across Canada will be utilized to protect the customer's IT assets:

- Decommissioning checklists for asset verification
- Department of Defence (DOD) standard data-sanitization process
- Complete reporting functionality

Compugen will perform a Data Eradication routine (wiping) for all data bearing assets destined for resale, in order to erase and destroy all data for the purpose of preventing such data from being obtained by a third party or other unknown entity. Compugen will also physically de-brand these assets to ensure no Customer asset tags or identifications are evident. In the event an asset is not capable of being wiped its data-bearing component will be pulled, documented, and quarantined to be physically destroyed via the recycling process.

"Thank you so much for the computer so I can have the ability to do much better in school."
